P30613 Pyruvate kinase PKLR

UniProtKB/Swiss-Prot protein

Overview (/interpro/protein/reviewed/P30613/)

Entries 9 (/interpro/protein/reviewed/P30613/entry/InterPro/)

Isoforms 2 (/interpro/protein/reviewed/P30613/isoform/)

Structures 62 (/interpro/protein/reviewed/P30613/structure/PDB/)

AlphaFold 2 (/interpro/protein/reviewed/P30613/alphafold/)

Sequence (/interpro/protein/reviewed/P30613/sequence/)

Similar Proteins 31k (/interpro/protein/reviewed/P30613/similar_proteins/)

Short name	*KPYR_HUMAN*
Length	574 amino acids (/interpro/protein/reviewed/P30613/sequence/)
Species	Homo sapiens (Human) (/interpro/taxonomy/uniprot/9606/)
Proteome	UP000005640 (/interpro/proteome/uniprot/UP000005640/)
Gene	PKLR
Function	Pyruvate kinase that catalyzes the conversion of phosphoenolpyruvate to pyruvate with the synthesis of ATP, and which plays a key role in glycolysis. Also produces the side product 2-phospholactate which can inhibit fructose-2,6-bisphosphate producti... **Show More**
Family membership	F Pyruvate kinase (IPR001697)

This sequence includes matches predicted by ✨ **InterPro-N**, an AI-powered deep learning model developed by Google DeepMind.
By default, InterPro matches are supplemented with novel InterPro-N predictions (novel matches or those at least 5% longer).
To change the display mode, open the *Options* menu below and select your preferred setting. See our documentation (https://interpro-documentation.readthedocs.io/en/latest/protein_viewer.html#interpro-n-display-modes) for an explanation of each display mode. If you use InterPro-N predictions, please include the InterPro-N citation (https://interpro-documentation.readthedocs.io/en/latest/citing.html#interpro-n) in your references.
